PRME	2021	International		
PRME	2020	International		

### 6.9. Sponsored Research (25)

**Research and Consultancy Projects:** No data available

### 6.10. Preparation of teaching Cases (30)

Knowledge creation, assimilation and dissemination are key objectives at IILM. Faculty members at IILM are encouraged to write teaching cases that can be used as part of the classroom teaching. The idea of developing cases is to encourage learners to develop critical thinking skills. The development of teaching cases gives the faculty at IILM a platform to develop academic scholarship, gives them an opportunity to interact with industry professionals and gain insights which they can take to their class. Teaching cases help the students develop clarity about the conceptual knowledge imparted during class delivery and its application in the real world. Faculty members at IILM are incentivized to write cases. These cases are then used as part of the module delivery.
